CME Outfitters Announces New Clinical Review Board Members

Editorial review panel features emerging clinicians and researchers at prestigious institutions

February 14, 2007

Rockville, MD— CME Outfitters, LLC, (CMEO), an independent accredited provider of multidisciplinary continuing education programming and related healthcare communications services, announces the installment of three new members to its Clinical Review Board. Members are selected on the basis of their clinical interests, educational contributions, and emerging stature at leading institutions across the United States.

The Clinical Review Board is a standing panel of physicians and credentialed experts who actively collaborate with CMEO's Medical Resources Group and faculty to maintain the highest level of medical accuracy and clinical relevance in the educational activities that the company produces. The Board's semipermanent term of service provides continuity of strategic vision and scientific review to the CMEO educational enterprise. The CMEO Clinical Review Board is involved in the development and review of literature updates, disease state overviews, clinician interviews, educational needs assessments, online activities, and patient case studies. The collaborative efforts of the Clinical Review Board and the CMEO Medical Resources Group result in the creation of highly relevant, evidence-based, best-in-class educational content.

CME Outfitters welcomes these new Clinical Review Board members (listed alphabetically):

Douglas Lee Boggs, PharmD, MS

Maryland Psychiatric Research Center
University of Maryland College of Medicine
Baltimore, MD

Dylan Patrick St. Xavier Wint, MD

Department of Psychiatry
Emory University School of Medicine
Atlanta, GA

Clifford J. Ehmke, MD

Department of Psychiatry
Emory University School of Medicine
Atlanta, GA

Please visit www.neurosciencecme.com/about_clinrevboard.cfm to view a complete roster of the CMEO Clinical Review Board.

These individuals will have a key role in creating content for neuroscienceCME.com, a professional website recently launched by CMEO to fill an online resource gap identified by clinicians practicing in disciplines related to brain function. The site's primary mission is to be the healthcare professional's central portal for accessing, debating, synthesizing, and implementing the latest findings and best practices in the neurosciences. Resources on the site encourage healthcare providers to **explore** the latest evidence, **connect** with their peers, **apply** education in practice and in virtual case studies, and through these efforts **advance** the field and improve patient outcomes.

CME Outfitters develops and distributes live, recorded, print, and web-based educational activities to thousands of clinicians each year and offers expert accreditation services for non-accredited organizations. For a complete catalog of certified activities, please visit www.cmeoutfitters.com, www.neuroscienceCME.com, or call 877.CME.PROS (877.263.7767).
